Mumbai, India

EDUCATION

Sardar Patel Institute of Technology (Autonomous) <i>Master of Computer Applications (MCA)</i>	Mumbai, India 2025–2027
Thakur Ramnarayan College of Arts & Commerce <i>Bachelor of Science in Information Technology</i>	Mumbai, India 2022–2025

RELEVANT COURSEWORK

• Data Structures	• Algorithms	• Database Management	• Computer Networks
• Cloud Fundamentals	• Software Engineering	• Operating Systems	• Distributed Systems

PROJECTS

AgentForge – AI No-Code Chatbot Builder 🔗 • React • TypeScript • Supabase • pgvector	2025
- Designed and built a multi-tenant SaaS platform that allows users to create and deploy AI-powered chatbots using Retrieval-Augmented Generation (RAG) without writing code. - Implemented a document ingestion pipeline with chunking, embedding generation, and pgvector-based semantic search to support accurate context-aware responses. - Built an embeddable real-time chat widget with theme customization, analytics dashboard, and automated fallback to human agents for unresolved queries.	
BidArena – Real-Time Auction Platform 🔗 • React • TypeScript • Node.js • MongoDB	2025
- Engineered a real-time auction platform supporting concurrent live bidding with JWT authentication and integrated Razorpay payment workflows. - Implemented WebSocket-based event broadcasting using Socket.io to propagate bid updates instantly across connected clients with low latency. - Automated auction lifecycle management using background cron jobs for expiry handling, cleanup workflows, and winner finalization.	
EzyVote – Decentralized Voting dApp 🔗 • Solidity • Hardhat • ethers.js • OpenZeppelin	2024–2025
- Developed a blockchain-based voting system using Solidity smart contracts to ensure immutability, transparency, and tamper resistance in election workflows. - Integrated ethers.js to enable seamless communication between the frontend and deployed contracts, including transaction signing and state synchronization. - Optimized contract gas usage and applied OpenZeppelin security standards to reduce attack surface and improve on-chain reliability.	

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C++
Frontend: React, TypeScript
Backend: Node.js, Express
Databases: MongoDB, MySQL, Supabase, pgvector, Prisma
Cloud & DevOps: AWS, Docker, Kubernetes, Linux
Blockchain: Solidity, ethers.js, OpenZeppelin
Developer Tools: Git, GitHub, Postman

ACHIEVEMENTS

Alkimi Move FWD Hackathon	2025
SPIT REDACT Hackathon	2025
NPTEL Certifications – ML, Big Data, Coding Theory	2024

LANGUAGES

English, Hindi, Marathi
